## Graduate Success Story

### Austin Winberg, a February 2018 Carpentry & Construction Technology Graduate from Triangle Tech, Pittsburgh

*"I chose Triangle Tech because I knew it was the place I needed to be, and I was right! At a point in my life where it was crucial to get myself together and begin a career is when I made my choice. I started at Triangle Tech with a mindset that I'm going to work hard, I'm going to apply myself like never before, and I'm going to acquire a set of skills that will make me a valuable asset to the working community.*

*I spent 16 months soaking up as much knowledge in my field as I could. I asked questions, I participated actively, and I developed comfort and skill with tools in which I now use every day. One of the most proud and rewarding statements I say to people is that I left school on Friday, and I started my career the following Monday. I have a position where I don't have to worry if there's work for me on a day-to-day basis. I have access to full benefits, paid vacation time, and soon to be, a retirement plan. There is room for advancement all the way from a laborer position to a project manager. I want to keep learning, so I'll soon begin the next part of my technical journey by transferring every credit I earned at Triangle Tech towards a Bachelor's degree. All of this wouldn't have been possible without my hard work, yes, but it also wouldn't have been possible without Triangle Tech. They helped me from the moment I walked into their doors as a visitor, and they continue to help me as an alumnus."*

The following **204** graduates of Triangle Tech were recently hired.
